PROFILE SUMMARY

An adaptable Information Science Engineering student with a strong foundation in programming, software engineering principles, and hands-on technical execution. Proven track record of delivering team-driven engineering projects, with a strong commitment to continuous learning and rapid technology adoption.

EDUCATION

Bachelor of Engineering - Information Science & Engineering,
Cambridge Institute of Technology

2023 - Expected 2027
Current CGPA: 7.6 (6th Sem)

SKILLS

Programming Languages	Python, Java, C
Frameworks and Libraries	Flask, OpenCV, Streamlit, SpaCy, NLTK, PyPDF2
Tools & Platforms	GitHub, Arduino IDE
Domains	Computer Vision, Natural Language Processing (NLP), IoT

EXPERIENCE

Web Developer July 2025 - October 2025
Parking Pop by SFM Technologies Pvt Ltd *Virtual*

- Designed and maintained scalable relational database schemas, ensuring seamless data flow between front-end UI components and the backend server.

Cyber Security Intern March 2026 - April 2026
Codec Technologies *Remote*

- Engineered a data privacy tool implementing AES symmetric encryption, applying PKCS7 padding and PBKDF2 key derivation to secure sensitive data blocks.
- Developed a high-velocity dictionary-based password cracker utilizing Python to test vulnerability thresholds of SHA-256 hashes.

PROJECTS

AI Based Resume Ranking. Built a full-stack screening tool leveraging NLP (SpaCy/NLTK) and Cosine Similarity to match resumes against job descriptions with 90%+ accuracy. Designed a dual-interface architecture featuring a Flask backend and a Streamlit recruiter dashboard, using PyPDF2 and pdfplumber for automated parsing.

Human Following Robot. Developed an IoT autonomous robot using Arduino Uno, ultrasonic sensors, and IR sensors to calculate target distance and trace human movement. Programmed system logic in the Arduino IDE to drive real-time locomotion via DC motors and mechanical sensors.

CERTIFICATIONS & COURSES

- OpenCV:** OpenCV Boot Camp Certification
- IBM:** AI Literacy Certification
- Lens Studio:** Completed Lens Studio Workshop
